About the 2011 Accountability System

The state accountability system assigns ratings to every campus and district in the Texas public education system each year. In most cases, the system assigns one of four rating labels —ranging from lowest to highest—**Academically Unacceptable, Academically Acceptable, Recognized, and Exemplary**. To determine a rating label, the system evaluates indicators of performance, including assessment results on the state standardized assessment instruments as well as longitudinal completion rates and annual dropout rates. Generally, campuses and districts earn ratings by having performance that meets absolute standards or by demonstrating sufficient improvement toward the standard. In addition to evaluating performance for all students, the performance of individual groups of students is held to the rating criteria. The student groups are defined to be the major ethnic and racial groups as well as students designated as economically disadvantaged. All of the evaluated groups must meet the criteria for a given rating category in order to earn that label.
